

Screens.2009

Community

We all need a place to work. A place for focused concentration.

And as individual participants in the organic whole of an organisation, we must experience free interaction with colleagues.

Create a sense of community and space. Be focused but stay connected.

Dynamics

The best office environments are those that support dynamic changes in workplace technologies and evolving work practices.

With the KLIP family of office screens you'll get superb flexibility, functionality and aesthetics to ensure your office will respond perfectly at any time.

Engineering

KLIP has a minimalist aluminium frame system - 22mm thick overall - and is connected with a low profile post system. Panels can be free-standing or desk-hung and are offered in a wide variety of sizes that can be configured as 180 degree (straight), 120 degree (3-way) and 90 degree (2-way, 3-way or 4-way). Translucent acrylic windows are available on request.

Work surfaces can be applied as semi suspended or freestanding modules within KLIP environments. KLIP complements the aesthetic and functional qualities of other Knight Group furniture ranges, making integration with Highrise, Cubit and Ergoplan modules very simple.

Installation requires no special tools. The ease with which KLIP panels and components can be reconfigured is one of the system's primary advantages.

Klip Xtra

KLIP XTRA is a fully featured ducted panel system with an internal cable raceway for simple cable reticulation.

KLIP XTRA supports technology intensive environments and provides direct access to power and communications at the workstation.

KLIP XTRA also incorporates accessories rails to accommodate worktops, shelves and a huge variety of personal accessories such as pen holders, file holders, magnetic boards etc.

KLIP XTRA – CABLE RACEWAY AND ROUTING FRAME

KLIP XTRA – ROUTING FRAME COVER

Klip Stnd

KLIP standard is an economical panel system offered in the same sizes but without cable raceway and centre rail to suit the budget-conscious.

KLIP STANDARD

KLIP SIMPLE INSTALLATION

Top slug and Midway slugs connect panels to posts, providing strong, secure joins.

KLIP CONNECTOR SLUGS

Midway slugs slip down edge of panel and are held in place with u-clip.

KLIP HIDDEN JOINS

Klip posts allow 5 different join configuration including 3-way 120 degree, 3-way T-join and 4-way crucifix

KLIP POSTS

Connect different height screens together without the need for special componentry.

Deskhung

Aesthetically unobtrusive, desk hung panels allow you to accent your furniture while visually screening desktop clutter.

CLAMP ON – CLAMPS FIT INTO CENTRE RAIL

Panels pictured in Granite

1200 Floor

Visually screens desktop clutter but is low enough to scan the room for colleagues while seated.

KLIP XTRA – RACEWAY CONCEALS CABLING

Panels pictured in Dune

1500 Floor

Totally screens environments for seated personnel while minimising effect on ambient light and air circulation.

The Future

Commitment to the environment is integrated into every aspect of Klip's lifecycle. Designed and built to last in its manufacture, use and disposal, Klip embodies the environmental principles of Reduce, Reuse & Recycle.

KLIP is designed for an extended product life and is backed with a 5 year warranty.

KLIP panels are manufactured under ISO9001 (Quality Management) and ISO14001 (Environmental Management) accreditation using sustainable materials, and are easily disassembled for recycling. Take back and recycling services are available.
